StudyMate AI

Autonomous Academic Task Agent

"Never Forget Your Academic Work Again"

Dashboard: focus queue and deadlines

Presented by: Gayathiri
B.Tech CSE | 3rd Year, Sec A

Problem Statement

1. **Subject overload**
   Juggling 6+ subjects, each with labs, records, homework and internals.

2. **Lost announcements**
   Notices get buried in WhatsApp groups and classroom feeds.

3. **Last-minute records**
   Lab records are remembered only when faculty asks.

4. **Passive to-do apps**
   They do not reschedule work or calculate academic urgency.

6+

subjects to track every semester

Missed

deadlines from forgotten tasks

Proposed Solution

An AI agent that steps in before deadlines slip.

Smart natural-language entry

“3 Java programs before Friday” becomes tasks.

OCR vision

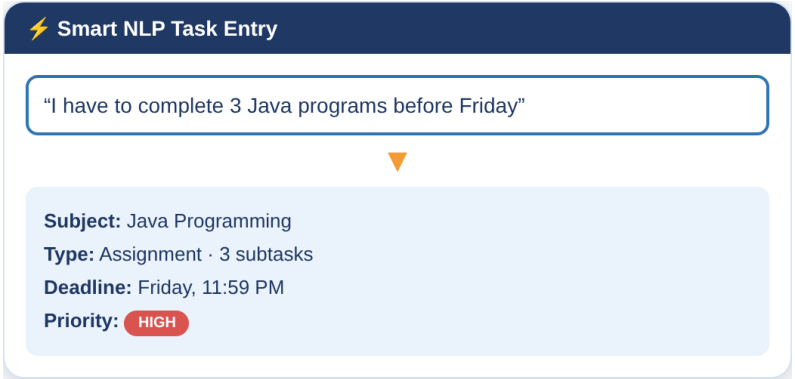

Blackboard photos and screenshots turn into tasks.

Forgetfulness protection

Alerts for repeatedly postponed work.

Auto-rescheduling

“Couldn’t finish today” rebalances the plan.

Natural-language parser extracts subject, deadline and priority

Key Features

1 Smart Task Entry

Extracts subject, deadline and priority; splits multi-part programs.

2 Multi-Stage Reminders

Alerts 3 days before, 1 day before and on deadline morning.

3 Document & Photo OCR

Notices become verified tasks instantly.

4 AI Priority Matrix

Dynamic urgency score for every task.

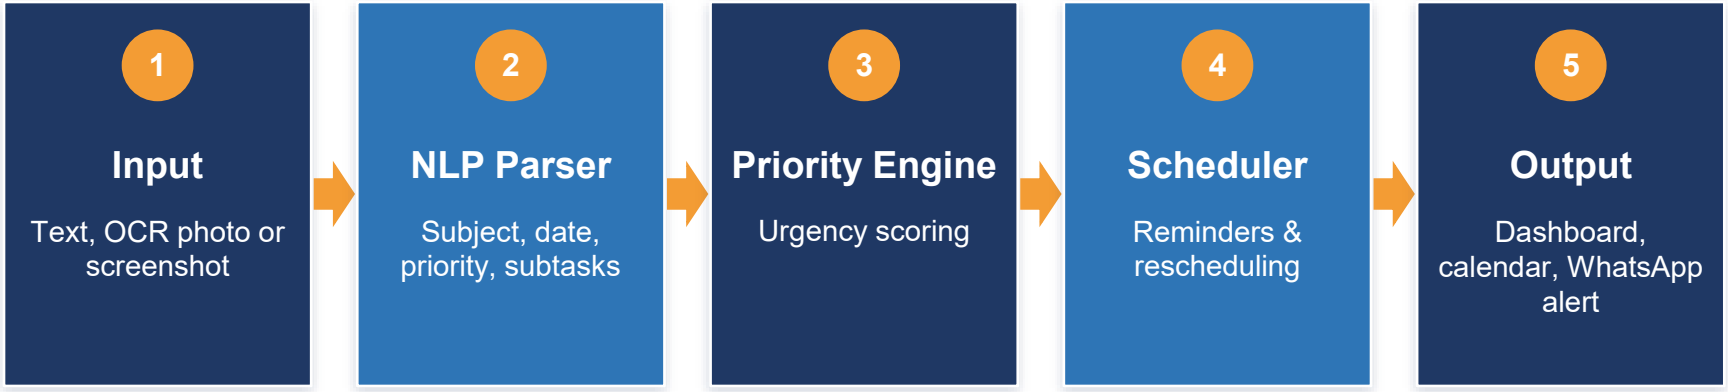

5 Automatic Rescheduling

Reorganises the study queue without overloading tomorrow.

6 Forgetfulness Protection

Audits stale, zero-progress and high-difficulty tasks.

System Workflow

The AI Assistant answers “What do I need to finish today?” and triggers auto-reschedule on request.

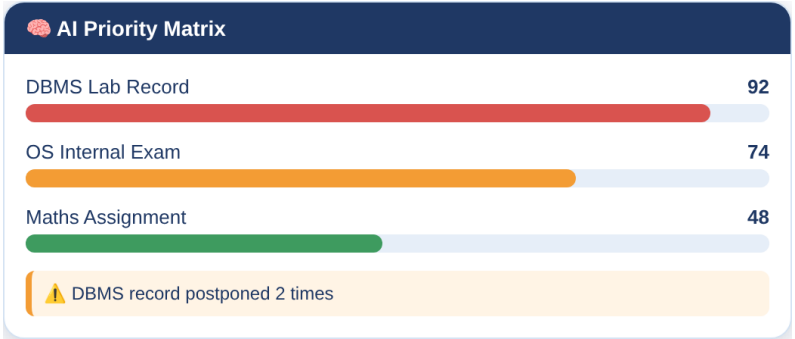

AI Priority Matrix & Forgetfulness Protection

Urgency score is derived from

Deadline	**Difficulty**
Time needed	**Postponed**

Continuous audit flags

- Stale tasks and zero-progress deadlines
- High-difficulty lab records near target date
- Repeatedly postponed work

Priority scores and postponement warnings

Application Modules

1 Dashboard
Due today, this week, completed

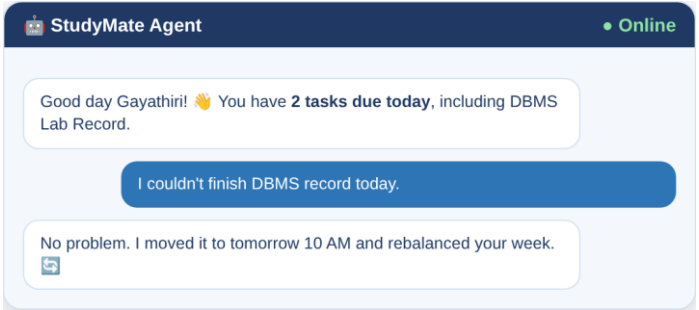

2 Add Task
NLP entry and OCR scanner

3 AI Assistant
Chat copilot with quick actions

4 Calendar
Monthly view with filters

5 Subjects
Labs, assignments, milestones

6 Analytics
Completion rates, habit tips

AI Assistant with auto-reschedule

Plus a notification centre with WhatsApp alert preview.

Conclusion & Future Scope

Conclusion

- Moves beyond a to-do list to a proactive agent
- Cuts missed deadlines and last-minute records
- Reduces stress through staged reminders
- Built specifically for college students

Future Scope

- Live WhatsApp and SMS integration
- Sync with college LMS and timetable
- Mobile app with push notifications
